EXPERIENCE

- **Tekion Corp. (Nagarro)** — Bengaluru, India
  Software Engineer — *Nov. 2023 - current*
  - : - Worked as a Developer in the accounting team to resolve tasks/user stories.
  - : - Responsible for End-to-end development of features, including gathering requirements from Product Managers, fixing bugs, testing, deployment on test environments, and writing unit test cases.
  - : - Developed REST API's to support Power Posting feature for Inter-franchise using java spring-boot.
  - : - Developed a configurable program to handle Invoice Types in Accounts Receivable.
  - : - Enabled Inter-franchise for Lookup Assets Services, by fetching details from multiple microservices using multithreading design patterns.
  - : - Introduced resubmit flow in approval workflow to handle Accounts Payable Invoices at Orchestration layer by consuming and dispatching a Kafka event.
  - : - Enabled exempted roles and users for a closed month to make transactions and create journal entries.

- **Nagarro Software Pvt. Ltd.** — Gurgaon, India
  Associate Engineer — *Sept. 2021 - Oct. 2023*
  - : - Working as a developer and my Project aimed at developing a robust and scalable e-commerce web application using Adobe Experience Manager (AEM) and Spring Boot Framework. AEM was a powerful content management system that provided a comprehensive solution for creating, managing, and delivering digital experiences across multiple channels.
  - : - Developed new feature for the application and maintained the existing one.
  - : - Developed several Rest API's using Spring Boot Framework and AEM.
  - : - Designed/Modified database changes using MySQL or JPA.
  - : - Wrote unit test cases using JUnit and Mockito.
  - : - Deployed code to developer's environment using Jenkins and Cloud Manager.
  - : - Successfully resolved bugs of both Backend and Frontend by checking the logs.

PROJECTS

- **Blog Application**: - Developed a website using Spring Boot and ReactJs which allows user to do CRUD Operation based on specific Category user can add blogs, add comments, Login, Sign UP, Logout.
  - **URLs:**: - Blog Application
  - **Back-end Repo:**: - Blog Application BE Github
  - **Front-end Repo:**: - Blog Application FE ReactJs Github
- **Hotel Booking System**: - Developed a website using Spring Boot Micro services architecture which allows user find all the Hotel based on their locations, based on Admin, Manager and Customer Role user can access the secured Rest API's by doing register, login.
  - **Repo:**: - HotelBookingSystem Github

SKILLS SUMMARY

- **Languages**: JAVA
- **Frameworks**: Spring Boot, Microservices, JPA, Rest Web Services, Spring MVC, AEM, HTML, CSS, Junit, Mockito
- **DBMS**: MongoDB, MySQL, Adobe DAM
- **Tools**: Git, Maven, Gradle, PostMan, Jenkins, AWS(Familiar), AEM Cloud Manager, Docker, Kafka
- **Others**: Data Structures and Algorithms (DSA), Data Base Management system (DBMS)
- **Soft Skills**: Leadership, Event Management, Public Speaking, Time Management

ACHIEVEMENTS

- **Certified Java Developer by**: Nagarro
- **Nagarro**: Recognised as a highly valuable employee.
- **HacktoberFest**: Won Free t-shirt, developer badge for Open source contribution
- **Ureckon**: Participated as a Volunteer
- **E-Cell UEMK**: Member of core-team

CERTIFICATIONS

- Java Programming Certified course by Udemy
- Web development Certified Course by Udemy

EDUCATION

- **University of Engineering and Management** — Kolkata, India
  Bachelor of Technology - Computer Science and Engineering; GPA: 7.99 — *July 2017 - June 2021*
